NÅR KVALITET TELLER

Unser Partner dignus medical stellt sich Ihnen vor

Dignus Medical, mit Sitz in Norwegen und Schweden, ist ein privates Unternehmen, das für den öffentlichen Sektor arbeitet. Wir sind darauf spezialisiert Fachärzte (w/m) an renommierte Krankenhäuser in Norwegen und Schweden zu vermitteln. Unsere Stellenangebote basieren auf den Aufträgen der verschiedenen medizinischen Abteilungen der Krankenhäuser, von denen wir beauftragt werden qualifizierte Bewerber für die betreffende Position zu finden. Somit ist unsere Arbeit ein kontinuierlicher Prozess, der durch die Auftragslage der Krankenhäuser bestimmt wird. Ab dem Zeitpunkt an dem Ihre Bewerbung und Ihr Lebenslauf bei uns eingehen bis wir eine Position finden, die zu Ihrem Profil passt, können daher einige Monate vergehen.

In Norwegen und Schweden besteht derzeit großer Bedarf innerhalb unterschiedlicher Fachrichtungen. Wir sind derzeit dabei Verträge mit weiteren Krankenhäusern einzugehen, welche die Rekrutierung von Fachärzten zum Ziel haben.

Unsere Erfahrung zeigt, dass deutsche Fachärzte über viel Expertise verfügen; ebenso schätzen die norwegischen und schwedischen Krankenhäuser die hohe fachliche Kompetenz und Integrationsfähigkeit in die respektive skandinavische Gesellschaft. Unsere Stellenangebote befinden sich geographisch sowohl im Inland als auch entlang der Küsten, in Süd-, Ost- und Mittel-Norwegen bzw. Schweden.

Der Verlauf beginnt damit, dass wir eine Position finden, die zu Ihrem Profil passt. Es ist wichtig zu berücksichtigen, dass der Prozess Zeit dauern kann. Wir (Dignus oder Panacea 4U) werden dann mit Ihnen in Verbindung treten und telefonisch ein erstes Interview mit Ihnen führen; zu einem späteren Zeitpunkt werden wir nach Deutschland kommen, um uns für ein Tiefeninterview zu treffen. Insoweit beiderseitiges Interesse besteht, werden wir Gespräche in Norwegen bzw. Schweden sowie einen Besuch am betreffenden Krankenhaus vereinbaren. Die Reise- und eventuelle Hotelkosten übernehmen wir.

Bei Interesse Ihrerseits freuen wir uns über den Erhalt Ihres Lebenslaufs in englischer oder Skandinavischer Sprache, sowie eines kurzen Motivationsschreibens (cover letter) warum Sie in Skandinavien arbeiten und leben möchten, samt eines Überblicks Ihrer fachlichen Schwerpunkte und Hauptinteressen.

Wir freuen uns darauf Sie kennen zu lernen!

Leitfaden für ärztliche Tätigkeit in Norwegen

Guideline for:

Application Form for Authorisation and Licence as Health Personnel in Norway

1. Individual and joint applications

The Norwegian Registration Authority for Health Personnel (SAFH) normally has agreements with Norwegian schools, colleges and university faculties in terms of which it is to be furnished with lists containing the names of candidates who have successfully passed examinations at their educational institution. Persons whose names appear on such lists are regarded as applicants for authorisation, and SAFH will notify these regarding the payment of fees, see pt. 8 below. Should you be a student at a Norwegian educational institution, you should enquire at the institution concerning the procedures to be followed before yourself applying. Applications for Student Licences by graduates at Norwegian educational institutions are normally processed in this manner, see pt. 5 below. There is no need to apply for a "Turnus Licence", see pt. 5 below.

2. Name

Use your full name as stated in your passport. Should the name stated in any of the documents submitted by yourself not correspond exactly with your name as stated in your passport, such difference should be documented/explained. A copy of a marriage certificate or certificate of change of name issued by the County Governor (Fylkesmann) or a certificate issued by the National Registration Office (Folkeregisteret), are examples of acceptable documentation. However, it is not necessary to document name change if your full 11-digit Personal ID-number appears on the relevant documents.

It is important that you always use the same name and spelling in connection with later communications.

3. Citizenship (Name of Country or Nationality)

Your stated nationality must accord with your passport. Should this not be the case, documented explanation must be supplied.

4. ID-number

The date of birth forms part of your Personal ID-number (Norw. "personnummer" or "fødselsnummer"). Should the applicant not have an ID-number, the date of birth should always be stated as: day.month.year (e.g. 14.02.1976)

5. Authorisation or licence; type of licence

An application will be for either authorisation or a licence. Authorisation as such may be refused even though there may be grounds for awarding a licence. In such cases, application for a licence should be made later. For some categories of health personnel, further information is given under Professions.

A Student Licence is only awarded to students of medicine, see separate regulations. Norwegian educational institutions will be able to provide guidance as to when application should be made. Applicants studying abroad should look under pt. 17 below, "Of special relevance to Applicants for a Student Licence".

With regard to Regulations Governing Practical Experience ("Turnus") for Health Personnel Section 1-4, groups doing "Turnus" (with the exception of prosthetists) must be in possession of a special "turnus" licence prior to the commencement of the period of practical experience. Candidates of medicine who have applied for "turnus" service and been accorded a place, will automatically receive a "Turnus Licence". Midwives and physiotherapy students who have had a place of service allocated to them will receive a licence without having to apply. Currently only medical candidates who in exceptional cases themselves have been allowed to find placement for themselves (after first obtaining the approval of SAFH), have to apply for a "Turnus Licence" by submitting a completed application form.

The validity of authorisation/licence falls away at the age of 75. A limited licence may be granted for 2 years at a time up to the age of 80, and later on for one year at a time.

6. Health personnel category

Separate application must be made for each professional category.

7. Main educational qualification

Only your main educational qualification is to be stated here. Applicants falling under Transitional Regulations and who apply solely on the basis of practical experience must leave this space open.

The country in which the qualification was obtained is regarded as the one in which the certificate of proficiency/professional licence/ certificate of apprenticeship was issued.

Leitfaden für ärztliche Tätigkeit in Norwegen

All relevant (primary, secondary, tertiary and supplementary) education which candidates wish to have assessed must be documented. References concerning practical or professional experience and education/training other than the main education must be included in the List of Enclosures, see pt. 8 below.

Professional experience may in some cases partially or wholly compensate for gaps in formal education/training, see under the various "Of special relevance to ..." under pts. 13-19 below.

8. List of Enclosures

The purpose of the List of Enclosures is to prevent mistakes in the processing of applications.

All applications must be accompanied by copies of:

- * Passport/other proof of identity and
- * Certificates of proficiency/professional licences/certificates of apprenticeship related to the main educational qualification.

In the case of applicants whose main education was completed more than three years ago, SAFH also needs documentation concerning refresher courses and any further education (e.g. diploma, certificate) and a résumé of relevant work experience (e.g. testimonials, confirmation of duration of present employment).

When application is made for a licence for health personnel over 75 years of age in cases where the applicant has been in possession of authorisation up to the age of 75, and in cases where application for authorisation or licence in which documented qualifications have been previously submitted, documentation need not be appended. This applies, among others, to applicants for authorisation as physiotherapists, midwives, chiropractors or doctors who have completed "turnus" and possess a "turnus" licence.

Norwegian citizens not in possession of a passport may submit copy of a bank or post-office ID-card instead. Foreign applicants living in Norway may use their National Passport or travel document issued by Norwegian authorities if the passport issued by the home country has been deposited with them or is otherwise not available.

The main educational qualification is to be documented by means of certificates issued by the relevant school, college or university. All pages of the relevant certification must be submitted. Statements stating grades achieved are insufficient. Professional certification or confirmation of apprenticeship may replace examination certificates. With respect to language, translation and certification of documentation, see pts. 11 and 12 below.

See under "Of particular relevance to ..." under pts. 13-19 below concerning supplementary information to be submitted where relevant.

SAFH may request additional documentation in individual cases where this is considered necessary.

"Description of enclosures" in the List of Enclosures may for instance read as follows:

1. Certificate "Høgskolen i Alta June 2000"
2. Passport issued in Bodø 1998
3. Employer's testimonial "Straightback institute of physiotherapy" issued Feb. 2001 (original)
4. "Confirmation of examinations passed - University of Kiel".

9. Fees

As from 1st January 2001, and in pursuance of the Health Personnel Act Section 53, a fee will be charged for the processing of applications for authorisation or licences. SAFH will send an invoice to the applicant when the application has been registered as received.

Processing of the application commences upon receipt of the fee by SAFH. The duration of processing will normally be several weeks.

For professional groups who are accorded authorisation upon completion of "turnus", the fee is NOK 1050. For authorisation of other groups as well as for licensing, the fee is NOK 700. There is no charge for the Student Licence or the "Turnus Licence".

Should the fee not have been paid within four months of despatch of the invoice, the application will be deemed to have lapsed and the case will be closed.

10. Signature

The applicant's signature must be in ink -ballpoint pen or felt pen (not black, preferably blue).

Leitfaden für ärztliche Tätigkeit in Norwegen

11. Language of Enclosures

All original documents not issued in Norwegian, Swedish, Danish or English must be translated into one of these languages by a state authorised translator. Translations are to be attached to the original language copy.

12. Attestation of enclosures

All enclosures must be attested or certified as true copies of the originals on every page. Signatures/initials as well as the official stamp are required. SAFH accepts attestation by a lawyer, educational institution, the police, notary public or other official institution (state or municipal) or certified copying bureau.

The certifying person must personally make the copy of the original document. SAFH may ask to see the original document when there is special cause. Fresh attestation may also be requested after making a practical assessment.

13. Of special relevance to applicants with educational qualifications and authorisation from Denmark, Finland, Iceland and Sweden

A copy must be submitted of the authorisation from the relevant country relating to the professional category applied for. The applicant may come under the rules for mutual recognition of the educational qualifications and authorisation pursuant to Agreement on mutual Nordic employment for certain categories within the health and veterinarian sectors (not yet translated into English). The professional categories encompassed are stated in the attachment to the specific agreement. Pt. 14 applies to categories which are not included in the stated agreement. Note that the foreign authorisation document does not confer authorisation or licence in Norway. Those wishing to practise their profession in Norway should apply for Norwegian authorisation or licence, and will then be accorded speedier processing.

14. Of special relevance to applicants with educational qualifications and possible authorisation by EEC countries other than the Nordic countries, and Nordic applicants who do not belong to professional categories encompassed by the Nordic agreement

A copy must be submitted of the authorisation issued by the relevant country for the professional category for which you are applying, provided that the country possesses authorisation arrangements for the category.

For other categories than those of medical practitioner, dentist, midwife and pharmacist, a detailed description of the study curriculum or course content as well as documentation of advanced training and further studies, must accompany the application. The description of the course content must state the admission requirements, educational level, subjects taught, description of objectives, and duration. With respect to theoretical aspects of the course, the number of hours devoted to each subject must be stated. Practical experience must be stated in terms of weeks devoted to each field/division. The summary must originate from each institution, and should state dates of commencement and completion of studies.

Relevant professional or practical experience must be documented if you wish to have it assessed as part of the basis for your application.

Applicants encompassed by EEC-regulations must also submit a "Letter of Good Standing" issued by authorities in the candidate's home country. The testimonial is a confirmation that the applicant has full approval to practise her/his profession in the country concerned, and should not be older than 3 months. Newly educated/trained applicants need not include such testimonial.

15. Of special relevance to applicants with educational qualifications from countries outside the EEC.

Any available authorisation/approval/licence from the relevant home country should be enclosed in cases where the country concerned possesses certification arrangements for the category.

A detailed description of the curriculum or course content issued by the educational institution must be enclosed with the application. This should include the level, admission criteria, content (subjects, objectives) and duration. With respect to theoretical courses, the number of hours devoted to each subject should be stated. Practical experience should be stated in weeks in each field of practice/division. The summary must be produced by the relevant educational institution, and the time of commencement and completion of the course should be stated.

Documentation of advanced and further studies as well as practical experience must be enclosed if you wish such to be assessed as part of the basis for your application.

Applicants for authorisation or licence as medical practitioner must state the month and year of successfully passing the proficiency test administered by the University of Oslo.

Leitfaden für ärztliche Tätigkeit in Norwegen

16. Of special relevance to applicants encompassed by regulations concerning transitional arrangements for authorisation and licensing of practitioners under the new regularised health personnel categories. It follows from the Transitional Regulations that practical experience may, after concrete assessment, totally or in part compensate for lack of formal education. Refer to information on the individual categories under Professions.

Professional experience on the part of applicants encompassed by the Transitional Regulations should be documented on the work experience form (only in Norwegian). The employer must sign, stamp and state the name and address of the institution/organisation. The original document must be submitted. The Norwegian Registration Authority for Health Personnel (SAFH) does not return original documents or copies.

17. Of special relevance to medical students at foreign educational institutions who are applying for a student licence.

Applicants for student licences to practise medicine must submit documentation from the relevant educational institution confirming that the applicant has less than one year left before the equivalent final examination and that all pre-clinical examinations have been successfully completed. Applicants with education or training from countries outside the EEC must in an accompanying letter state the month and year of the relevant proficiency test administered by the University of Oslo.

18. Of special relevance to applicants who have completed their "turnus"

Applicants for authorisation as medical practitioner, physiotherapist or midwife, should submit certification of completed "turnus" on the relevant set form. Applicants for authorisation as chiropractors and prosthetists must document that their "turnus" has been completed and approved pursuant to current regulations.

19. Of special relevance to applicants to be licensed as medical practitioners

An accompanying letter must state the date at which employment in Norway has been approved or is expected to commence. SAFH will, as far as is practicable, process the application sufficiently rapidly for a decision to have been made before this date. However, applicants must always take into account the time which postal delivery, payment of fees and processing, necessarily require.

20. Address to which applications are to be sent

The application, together with required documentary enclosures, is to be addressed to:

Norwegian Registration Authority for Health Personnel (SAFH)
P. O. Box 8053 Dep
NO-0031 OSLO
Norway

Please do not write an individual employee's name on the envelope.

Leitfaden für ärztliche Tätigkeit in Norwegen

Anerkennung der ärztlichen Approbation und Facharzt für Bürger der EU/EEC mit primärer ärztlicher Ausbildung und Abschluß an einer EU/EEC Institution

Sie stellen zuerst Ihren Antrag auf Anerkennung Ihrer ärzt. Approbation bei der SAFH, www.safh.no, (Antragsformular liegt anbei)

Alle einzureichenden Dokumente müssen sowohl in einer beglaubigten Kopie des Originals und zusätzlich entweder in norwegisch oder englisch übersetzt sein. Die Dokumente müssen von einem vereidigtem Übersetzer beglaubigt sein.

Folgende unterlagen müssen eingereicht werden:

- Staatsexamen III. Abschnitt
- Approbationsurkunde
- CGS /certificate (oder letter) of good standing, erhalten Sie von Ihrer Landesärztekammer

Die Behörde erhebt eine Gebühr in Höhe von NOK 700,00 (z.Zt.) Die Bearbeitungszeit beträgt ca. 4-6 Wochen nach kompletter Einreichung.

Facharztanerkennung

Norwegische oder englische beglaubigte Übersetzungen aller Dokumente.

- Beglaubigte Kopie der Facharzturkunde/n
- Beglaubigte Kopie des Pass oder Personalausweises
- Urkunde der norwegischen Approbation durch die SAFH (s.o.)
- Antragsformular
- Dokumentierte Information zu:
 - Einrichtung/en und Ort/e wo die FA WB erfolgte
 - Patientenumfang
 - Dauer der WB
 - Inhalte der WB
 - Ort / Datum wann der FA erteilt wurde

Einreichung des Antrags bei: **Den Norske Lægeforeningen**

Postadresse: Postboks 1152 Sentrum, 0107 Oslo, Telefon: 0047-23 10 90 00

Adresse: Akersgata 2, N-0107 Oslo (Inngang Christiania torv), www.legeforeningen.no

Die Bearbeitungszeit beträgt 2-3 Monate. Alle Kopien Ihrer Originale müssen beglaubigt sein, alle Übersetzungen müssen ebenfalls beglaubigt von einem vereidigten Übersetzer sein.

Wir sind Ihnen gern bei der Antragstellung und bei der Erreichung von Übersetzungen behilflich.

Bitte beachten Sie, dass Sie für ein Vorstellungsgespräch gute englische Sprachkenntnisse benötigen. Grundkenntnisse der norwegischen Sprache sind ebenfalls von Vorteil, jedoch nicht immer Bedingung. Es muß die Bereitschaft bestehen die Landessprache möglichst schnell und gut zu erlernen.

Bitte setzen Sie sich auch hierfür mit uns in Verbindung.

Leitfaden für ärztliche Tätigkeit in Norwegen

Sprachqualifizierung

Für ein erstes Vorstellungsgespräch bei einem potentiellen Arbeitgeber in Norwegen ist es ausreichend mit guten englischen Sprachkenntnissen aufzuwarten.

Norweger sprechen im Allgemeinen sehr gut englisch. Für eine ärztliche Tätigkeit ist natürlich eine sehr gute norwegische Sprachfähigkeit unerlässlich.

dignus-medical hat hierfür in Zusammenarbeit mit der Universität Oslo ein Sprachstudium zum Selbstlernen entwickelt. Dies wird Ihnen als kostenlose Serviceleistung zur Verfügung gestellt, sobald Sie offiziell im Bewerbungsprozess eingegliedert wurden. Es ist wichtig, dass Sie bereits an Ihrem ersten Arbeitstag Grundkenntnisse der norwegischen Sprache beherrschen.

Ihr späterer norwegischer Arbeitgeber wird Ihnen im Allgemeinen innerhalb einer Trainingsphase von einigen Monaten auch Gelegenheit zum weiteren Sprachstudium ermöglichen.

Norwegisch ist für Deutsche normalerweise eine relativ leicht und schnell zu erlernende Sprache. Wie in vielen anderen Bereichen auch, ist manchmal der Einstieg der schwierigste Teil. Aus diesem Grund hat Panacea 4U gemeinsam mit einem professionellen Sprachlehrer für die norwegische Sprache (bokmål) einen „crash-kurs“ entwickelt. Dieser Kurs findet an einem langen Wochenende in Hamburg statt. Zeitpunkt und Ort wird je nach Bedarf bekannt gegeben.

Sie werden im Laufe des Kurses automatisch eine Menge über Norwegen, norwegische Kultur und Lebensweise erfahren. Nach dem Kurs werden Sie sehr gut in der Lage sein das Selbststudium erfolgreich durchzuführen.

Denken Sie bitte daran, es wird auf Ihren zukünftigen Arbeitgeber einen sehr positiven Eindruck hinterlassen, wenn Sie bereits im Interview mit einigen Sprachfähigkeiten aufwarten können.

Falls Sie schon jetzt Interesse haben an einem Einführungs-Crash-Kurs norwegisch teilzunehmen, können Sie sich hier unverbindlich vormerken lassen. Schicken Sie uns eine email an diese Adresse norsk@panacea.de und teilen Sie uns bitte Name und Adresse mit. Wir werden Sie dann automatisch über den nächsten Termin informieren. Sie können uns auch diese Seite faxen: 040-431 93 154

Ich bin an einem norwegisch crash-kurs für Ärzte in Hamburg interessiert
Name:
PLZ/Ort:
Telf/ email
Fachrichtung:
Mein Wunschtermin für den Beginn einer Tätigkeit in Norwegen wäre:
Ich war schon einmal im Urlaub in Norwegen ja <input type="checkbox"/> nein <input type="checkbox"/>
Ich benötige in Hamburg ggf. ein Hotel Klasse: Low Cost - Mittel - Luxus

Diese Voranmeldung ist völlig unverbindlich und kostenlos. Sie dient lediglich zur Ressourcenplanung. Sobald ein Termin feststeht nennen wir Ihnen Ort und Datum, sowie die entstehenden Kosten.

Application Form for Authorisation and Licence as Health Personnel in Norway

For SAFH

To

**Norwegian Registration Authority
for Health Personnel (SAFH)**

Postboks 8053 Dep
NO-0031 OSLO
Norway

Read the guidelines, fill in the form on the screen, print, sign, and send the form by ordinary mail

Personal Information

Surname / Family Name		Given Name(s)	
Postal Address		Postal Code / City / Post Office	
Country	Citizen (choose from list)	Sex
